

Remarks

I. Response to Rejections under 35 USC Section 103:

At page 4, item 4 of the Office Action, claims 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 21, 25, and 26 are rejected under 35 USC Section 103(a) as being unpatentable over "Klug" (US Patent number 6,591,245) in view of "Miyasaka" et al. (US Patent number 6,766,362).

The Applicants respectfully assert that **Miyasaka is not prior art**. The effective date of Miyasaka (that is, the date Miyasaka was filed in the US) is **July 28, 2000**. However, the present application was filed in the USPTO receiving office under the Patent Cooperation Treaty on **June 1st, 2000**. Thus, Miyasaka is not valid prior art that can be cited against the Applicants claims. The Applicant has attached a copy of the Express Mail receipt and the received postcard indicating the filing date of June 1st, 2000. Page one of the priority PCT application, showing the International Filing Date of 1 June, 2000, has also been included.

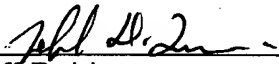

In order to advance the prosecution of the present application, the Applicant has incorporated the limitations of claim 9 into independent claim 1 and incorporated the limitations of claim 25 into independent claim 22. Claims 9 and 25 have been canceled. Thus, the Applicants assert that all claims of the present application are allowable over all legally-cited prior art of record.

Accordingly, the Applicant requests that the Examiner withdraw all rejections to the claims and pass this Application onto allowance.

II. Additional Fees:

It is not believed that additional fees are due at this time; however, if any additional fee is required in connection with the filing of this Amendment, please charge the fee to Deposit Account No. 08-2025.

Respectfully submitted,
Aloke Gupta et al.

(54) Title: A SYSTEM AND RELATED METHODS FOR DYNAMICALLY COMPILING A PUBLICATION

(57) Abstract: A system (10) for dynamically compiling a publication (6001) is presented including one or more publication agents (500) coupled to a plurality of content providers (50, 80) through a network. The publication agent(s) (500), responsive to receipt of a publication profile (641), selectively issue one or more requests for content from select content providers (50, 80) at a time(s) appropriate to the requested content. In this regard, the publication agents (500) function to improve the accuracy, timeliness and relevancy of the content comprising the generated publication (6001).
